Chapter 5. Application UI

This section describes the 60KWh user interface. You can find here the description for each of the UI components.

The application is structured in two screens.

Talk Selection Screen

The login screen is the first screen of the application

The screen allows you to:

1. Select the talk you want to enter
2. Specify credentials, if you are logging in for the first time.

The screenshot shows a window titled "Welcome to Talking Circle". Inside the window, there are three labels with corresponding input fields: "Select talk:" with a dropdown menu showing "Sale Incidents" and a downward arrow; "User:" with a text box containing "Robert"; and "Password" with an empty text box. Below these fields is a button labeled "Enter talk". In the bottom right corner of the window, there is a small circular icon containing a question mark. The window has a standard title bar and a thin border.

In the **Select talk** combo box you can choose an existing, on-going talk, or enter a name to start a new one.
